10ft / 3m Nautflex Control Cable

Compatible with Morse Teleflex 33C

For a smooth and easy operation of gear shift and throttle control. Suitable for all Yamaha and Parsun outboard motors. They are also compatible with 33C Morse and Teleflex brands. These cables are made of stainless steel lubri-core solid wire construction and manufactured to exceed engine makers specifications. Durable UV resistant, Polyethylene outers resist abrasion to withstand the effects of saltwater, chemicals, petrol & oils.

The cable length is 10FT / 3m.

To determine the length of replacement cable needed, measure from tip to tip and round off to next whole foot.

Features:

- Length: 10ft / 3m
- 1 Cable per box
- Nominal 75mm travel.
- Stainless steel core wire.
- End fittings: 10-32 UNF threads.
- 150mm minimum bend radius.
- Fits directly into Teleflex Morse controls.
- Wire strand reinforced outer jacket. Outside diameter - 6.7mm.
- Compatible with Yamaha & Parsun outboard motors
- Suits stern drives, inboards and outboards.

Control cables to suit:

- Engines Engine Control Cables
- Yamaha Outboard C8
- Suzuki Outboard C8
- Tohatsu Outboard C8

- Honda Outboard C8 or C33
- Sterndrive Volvo Penta C8
- Inboard C8
- Force Outboard C8
- Selva Outboard C8

WHY BUY FROM US?

This is why, See Below

Please take care when measuring for cable length. If you have ordered the wrong size cable we are happy to exchange for the correct size (if in stock) As long as the cables are sent back to us in the same condition including the packaging as we sent it to you. So dont rip or destroy the box until you know you have the right size. The cables have to come back clean and unmarked. Any postage costs involved needs to be paid for by the buyer.
